DETAILED ACTION

1. This Office Action responds to Applicant's amendment and ADS filed on 6/26/2006, and interview conducted on 8/4/2006. Claims 1-31 are pending, wherein claims 1,5,11,13,16,18-20,25-28,30 have been amended. Claims 1-31 have been examined and are allowed, wherein claim 18 is subjected to the following Examiner's Amendment.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Keith A. Kanroo (Reg. No. 36,480) on 8/4/2006.

The application has been amended as follows:

In the specification:

"found at <http://www.ee.eng.hawaii.edu/~smtih/ASICs/HTML/Verilog/Verilog.htm>," (page 2 of amendment filed on 6/26/2006) has been deleted to remove the hyperlink, as shown in the attached sheet.

In the claims:

As per **claim 18**, "signal-bearing" has been replaced with --computer readable--.

Priority

3. Acknowledgement is made of the Application Data Sheet filed on 6/26/2006, which properly corrects the claimed provisional application number. Accordingly, the benefits of the earlier filing date of the provisional application number 60/452,143 has been granted.

Allowable Subject Matter

4. **Claims 1-31** are allowed.

5. The following is an examiner's statement of reasons for allowance:

As per **claims 1-24**, Applicant's amendment and arguments filed on 6/26/2006 set forth the patentability of Applicant's claimed invention, wherein as pointed out by Applicant, the prior arts made of record failed to teach or suggest the inventive steps/means comprising the equivalence checking being for equivalence of circuit abstractions of the configured circuits (or design or design abstraction) and the at least one test pattern (or the plurality of individual circuits or test patterns or test case design) as claimed, as part of the method/apparatus/computer readable medium/system for checking/testing whether a programmable logic device functions properly when configured/programmed, as claimed (see applicant's amendment filed on 6/26/2006, pages 11-14). Other prior arts made of record similarly failed to teach or suggest the inventive steps/means as claimed. Accordingly, the claimed invention is novel and unobvious over the prior arts made of record.

As per **claims 25-31**, the Office Action mailed on 4/5/2006 sets forth the patentability of Applicant's claimed invention, wherein as previously indicated, the prior arts made of record failed to teach or suggest the inventive steps of renaming the cell of

the logic block, in combination with the steps of filtering, translating, and parsing as claimed, as part of the method of checking whether a programmable logic device functions properly when configured, as claimed. Furthermore, Applicant's amendment filed on 6/26/2006 removes all of the minor informalities noted. Accordingly, the claimed invention is novel and un-obvious over the prior arts made of record and becomes allowable.

Conclusion

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
